

Capital Needs of Georgia's Cities, 2020-2024

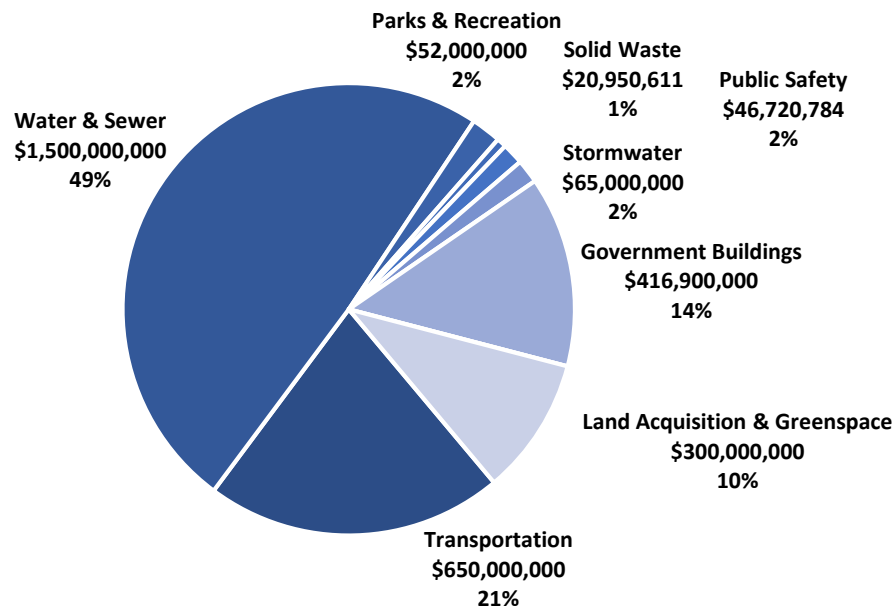

229 Georgia cities (42.6%) reported they will need about \$12.7 billion to address capital needs for the next five years (2020-2024). **Based on survey responses, GMA projections indicate that Georgia's cities will need approximately \$20 billion for capital projects over the next five years.** The greatest category of need for most cities is water and sewer, followed by transportation, public safety, and government buildings.

Georgia Cities Projected Capital Needs, 2020-2024

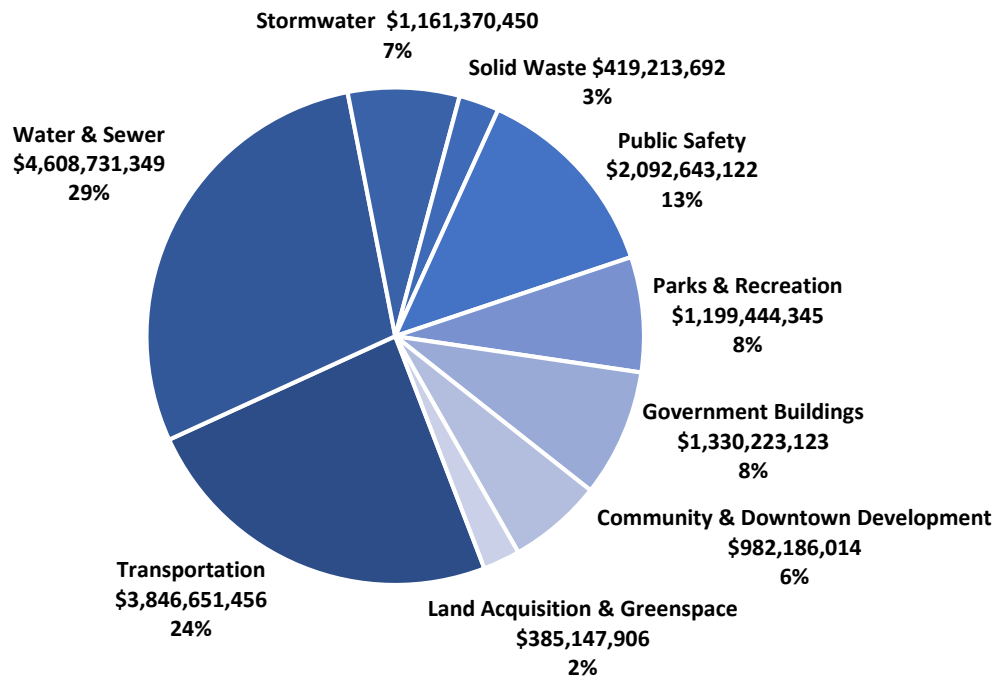

The City of Atlanta's survey response indicates 49% of capital needs are for water and sewer infrastructure, followed by transportation and government buildings.

City of Atlanta Capital Needs, 2020-2024

Georgia Cities Projected Capital Needs, 2020-2024 (excl. Atlanta)

Key Points

- Over the next five years, GMA projects that cities will need approximately \$20 billion for capital improvements.
- Failure to address these needs jeopardizes the public's health and safety and threatens the state's economy.
- A strong partnership between federal, state, and local governments is imperative for municipal leaders to keep Georgia cities vibrant, safe, and healthy for families and businesses.
